Last year, we celebrated our 15-year anniversary at SilencerCo by commemorating the Sparrow 22. This was the first product we ever built – the product that started it all.

In 2024, we are celebrating the *second* product we released – arguably the product that put us on the map. The Osprey was immediately popular because of its unique design. It was the first eccentric, or non-round, pistol suppressor on the market. This gave the Osprey an iconic look, making it so popular that it ended up in

several video games and movies. Call of Duty, Far Cry, The Accountant and The Walking Dead are just a few of the video games and productions that picked it up.

While the Osprey is immediately recognized for its bad-ass look, its design provides many functional benefits as well. The polygonal shape allows the bore to sit below the shooter's

line of sight. This makes the Osprey functional with standard pistol sights rather than needing to switch to suppressor-height sights.

Most importantly though, the greater internal volume of the Osprey means that sound has more room to dissipate. This results in greater overall sound suppression. Users can even shoot the suppressor "wet" by using 5cc of water or wire pulling gel to temporarily make sound suppression even quieter.

We recently released a 2.0 version of the Osprey that implemented a push-button locking system for quick and repeatable indexing.

This means the shooter will be able to consistently put the suppressor in the same position, even after removing it from the firearm. The Osprey 2.0 is easier to use than ever and enhances the shooter's experience. Plus, removing the cam-lever made this sleek suppressor even sleeker.

It's available in both an Osprey 9 and Osprey 45 option. The Osprey 9 is rated for 9mm, while the Osprey 45 is multi-caliber and can be shot on 9mm to .45 ACP.

The Osprey is constructed from aluminum and 17-4 stainless steel to keep its footprint lightweight. It also gives shooters the ability to engage targets while reducing the risk of pistol malfunctions.

The features that made the Osprey stand out when it was originally launched are still what make it unique today. This staple suppressor is unlikely to be forgotten, even amidst new releases.

Osprey 9 2.0, HK USP

This gave the Osprey an iconic look, making it so popular that it ended up in several video games and movies.
